

ABET LAMINATI Exterior Building Panels

Date: Completed Spring 2006
Project: Brooklyn Public Library
Architect: ABC Architects, NY, NY
Installer: IDA, Derby CT
Product: Exterior Laminate
Building Method: Rain Screen

Patrick Hebert, Architect ABC Architects:

"We at ABC Architects were attracted to the laminate/MEG material for a few reasons. . . .

The rear facade of this building was land marked. The exterior laminate material allowed us to use a panelized system that was both complimentary to the adjacent stone facade, yet was a distinctly modern material. The use of this modern material also provided more flexibility in designing joint patterns as well as the advantage of being lighter than stone panels."
