Ten Staining Agents and How to Clean

Transmission Fluid	Windex or Goo Gone
Bleach	Water (some color fade)
Mustard	Soapy Water
Nail Polish	Acetone or Lacquer Thinner
Worcester Sauce	Warm Water
Brown Show Polish	Lacquer Thinner or Goo Gone
Permanent Marker	Lacquer Thinner or Acetone
Lipstick	Goo Gone, Acetone or Lac. Thinner
Crayon	Lacquer Thinner
Spray Paint	Lacquer Thinner

All staining agents were applied and let to set stain for over 20 hours. Brand names were used for identification of cleaning categories. Windex for ammonia cleaner and Goo Gone for common orange cleaner were used.

For normal cleaning, warm water and mild soap work well. Also recommended are typical ammonia based cleaners as described above.
